

Station: Kinder und Familienhaus Luther

Bildungsguide „Familienchance - Freiburg“

Sprache: Englisch

My name is Monika Blüm and I am the director of the Luther Children and Family House. The responsible body for our House is the Protestant Church in Freiburg.

We take care of forty-four children in two groups, aged three to six years old. The kindergarden is open from half past seven until half past two in the afternoon and we also provide a warm lunch.

Question: How can a family apply for a place?

The application can be submitted online via the Central Reservation System. You can find it on the homepage of the City of Freiburg. The fees depend on your income, but they may also be absorbed. We can provide you with a cost absorption form. Interested families can visit our kindergarden. For this, please make an appointment beforehand with me.

Question: What activities are available in the kindergarden?

Various activities that improve language (everyday and specific language training in small groups), that improve physical condition and creativity, that invite in various group and intensity rooms to keep oneself busy, alone or with friends. To keep up to date in these educational domains, our team regularly receives further training.

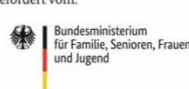

Question: Who attends the kindergarden?

Our intercultural kindergarden is attended by children of various religions and mother tongues, such as Turkish, Arabic, Spanish, Aramaic, Italian, Croatian and German.

Not only do we show our special appreciation through the “Sprachkita-Bundesprogramm“ (Language-Kindergarden-Federal Programme), but also through projects developed by the entire team. Attending our kindergarden offers multilingual children the great chance of learning the German language in everyday conversation.

Question: Who takes care of the children and provides the education and the upbringing of the children?

In my multiprofessional team there are also, in addition to the educators, speech and psychomotor therapists, early childhood pedagogues and social workers. At the moment we have an Arabic-speaking apprentice. She can build bridges for children and parents.

We are pleased to welcome trainees and youngsters who want to do a voluntary social gap year and who can get to know the cultural diversity here.

Question: What is so special about the Luther Children and Family House?

Due to the fact that I have been working in this district for the past 38 years and I have known many families for generations, I believe that many of them have trust and confidence in me, beyond my activity as an educator. Many families have been with us for a long time and enjoy the familiar atmosphere of our House.

Language, inclusion and cooperation with the families are our top priority and appear in everyday kindergarden life in manifold ways.

We built contacts to various cooperation partners, such as the Klara Family Center and various sources of financial aid. We provide individual support opportunities in our kindergarden, as well.

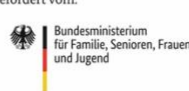

Since the new construction of the Luther Children and Family House in September 2018, we have a generous multiple-purpose room that is used for special activities, such as plurilingual backpack-groups, language courses, international lunches, kids' afternoons with handicraft works and baking activities, by parents reading in multiple languages as well as by the periodical Open Cafés with Games and Sports. These activities are free of charge.

We initiated the first contacts between the children and the residents of the Dreisam Adult Care. This is an exciting and nice experience for the young and the old.

In order to be fair to everybody, our new kindergarden is finally a barrier free and handicapped
